## **Corps schedules sediment report information meeting for March 26**

Yankton, S.D.— The U.S. Army Corps of Engineers will conduct an informational meeting to address issues relative to the reconnaissance report titled ‘Niobrara and Missouri Rivers, South Dakota and Nebraska, Sediment Strategies.’ The report examines issues of concern previously raised by local groups, individuals, potential sponsors and other interested parties.

The meeting will take place Wednesday, March 26 at the Best Western-Kelly Inn, located at 1245 Highway 50 West, in Yankton, S.D. It begins at 7 p.m. and ends at 9 p.m.

The reconnaissance portion of the study was completed in November 2001. Workshops were held in January and February 2002 to allow interested parties to identify additional options. The findings of the additional investigation will be presented and discussed at the meeting.
